NOTE: This list will be updated as new sources or aggregate/media become approved. To view our most current list, please visit our web site at [www.eiph.idaho.gov](http://www.eiph.idaho.gov) and click on the link under **Additional Septic Forms and Program Services**.

Health District approval of an aggregate or construction media source only provides **verification that the source is capable of producing** these materials in conformance with the material specifications.

**The Health District may still disapprove drainfield aggregate or construction media** if it becomes contaminated during processing, loading, transport, storage or installation either at the source location or at a subsurface sewage disposal installation site. It is the responsibility of those processing, providing, transporting, storing or installing the aggregate or media to ensure the drainfield aggregate or construction media maintains its approved characteristics (i.e. size and cleanliness).
